PROFILE

Technical Support Engineer with a Mechatronics background, specializing in complex system diagnostics and sustainable resolutions. Experienced across robotics, fintech and e-commerce. Connects customer-facing operations with engineering through evidence-backed root cause analysis, Python automation and a “fix it once” approach to documentation.

EXPERIENCE

B2BROKER - Tier 2 Technical Support Engineer | Jul 2025 - present · Remote

- Investigate financial-platform issues across B2Core, B2Copy, B2Trader and MT5/cTrader integrations through server logs, metrics and data consistency checks.
- Use Grafana, Loki, Prometheus and Datadog to distinguish critical incidents from monitoring noise; perform read-only Kubernetes diagnostics.
- Prepare engineering escalations with validated hypotheses and reproduction steps; translate technical findings into clear customer updates.
- Automate reconciliation and repetitive support tasks with Python and AI-assisted workflows; document patterns for reusable troubleshooting.

Avidbots Corp. - Technical Support Specialist | Feb 2025 - Aug 2025 · Cali, Colombia

- Diagnosed autonomous robots remotely using telemetry to separate hardware faults from software logic errors.
- Documented resolution workflows and collaborated on sensor-integration and network-latency edge cases.

eBay - Technical Support Specialist | Dec 2023 - Feb 2025 · Remote

- Resolved platform-access, account-security and transaction issues in a global, high-volume support environment.
- Recognized recurring patterns to distinguish wider platform incidents from individual cases and communicated clear next steps.

SELECTED PROJECTS & AUTOMATION

Algorithmic Trading System | Nov - Dec 2025

- Built a Python system that processes market data via APIs and executes rule-based decisions, with API-failure handling and log-informed parameter refinement.

Jira Digest & Escalation Follow-up | May - Sep 2026

- Built a command to summarize changes in open development tickets. Extended follow-up workflows with brand filtering, per-ticket state and incremental review to identify client-ready updates.

Shift Handover Automation | In progress

- Building a structured workflow to preserve incident context, ownership and next actions across time zones.

TECHNICAL SKILLS

Observability: Grafana, Loki / LogQL, Prometheus, Datadog, log analysis, read-only Kubernetes diagnostics.

Technical: Python, SQL read queries, Linux, REST APIs, JSON, jq, TCP/IP, DNS.

Operations: Root cause analysis, incident lifecycle, SLA management, Jira, Zendesk, Intercom, Confluence, GitLab.

Domain & AI: MT5 / cTrader, copy trading / PAMM, payment integrations, robot telemetry, Claude Code, MCP, skills and agents.

EDUCATION & CERTIFICATIONS

Universidad Autónoma de Occidente | Cali, Colombia | Jan 2019 - Dec 2024
Mechatronics, Robotics and Automation Engineering

Google: IT Automation with Python · Microsoft: IT Support Specialist
IBM: Data Engineering Professional · Google: Technical Support Fundamentals
